County Park Cabins

Previously we have discussed getting additional cabins for the county park. I believe that we should add to our number of cabins, and when we do, we should purchase 1-2 cabins of a slightly larger size that we can charge a higher rate for. The question is when to do it, and the problem is that we need to address the foundation of the current cabins before the beginning of next season due to the animal issue. The foundation for the current cabins is not wide enough and deep enough to keep animals from burrowing underneath, which led to our enormous skunk problem this year. The bill for removing the skunks was in the thousands, and we were extremely fortunate to not have further problems with the skunks. We will need to at the very least move the current cabins off of the foundations and widen those foundations to prevent burrowing. However, now might be the time to consider adding at least one cabin of larger size to lakefront spots prior to expanding the foundation so as to not have to do that twice. We have identified multiple suitable spots to add cabins or relocate the current cabins to if we were to purchase more.
