

-Otsego County-
Gaylord Regional Airport NEWS

During the (COVID-19) pandemic our airports newsletter intends to continue keeping our airport family informed to give you a light hearted window into our operations and lives. Please consult your local health department and government agencies for official updates.

Feb 2020

February operations at GLR were no small task but in low freezing temperatures and thick blowing snow, our runway and fuel operations team continue to meet all of our customers needs

Otsego County's Gaylord Regional Airport and its "can do" team are a vital part of the community's medical response element and has had (9) Airport Assisted Emergency Medical Flights in the first 3 months of 2020

Do you find yourself talking to your pets more? If so how are they dealing with all that added attention

Temporarily Cancelled: All please be advised that our usual monthly Veterans Coffee meeting at the airport has been temporarily cancelled for April 2020.

Not COVID Related

This week the aircraft and crews of the U.S. Forest Service arrive to base operations out of the Gaylord Regional Airport. Their annual repositioning to GLR's central location allows them to neutralize fire threats as they emerge!

Thanks to all the Critical Workers!

- Doctors & Nurses - Truck Drivers
- Grocery & Gas Station Workers
- EMS, Law Enforcement, Fire Dept.
- Pharmacists, Dispatch, Military
- Infrastructure Support agency's
- And everyone staying at home!

During the COVID -19 crisis our GLR airport based cargo companies are still bringing in daily more than 2,000 lbs. of overnight, just in time parcels from documents and parts to food & meds!

It was only a few short months ago we took part in the General Aviation RoundTable discussion at the MAAE Conference. It will not be that long till we are all able to do it again. This crisis will not last forever, no crisis ever does. Check in on each other "by phone, email or text" and don't let anyone feel alone without the routine or support of their work familys. Our essential aviation mission continues but our people still come first! Be well
