

-Otsego County- Gaylord Regional Airport NEWS

Our GLR airports Shari Rivest cleaning up the terminal before the COVID Crisis and her again after. You may see the reflection of the newly installed Plexiglas at the reception counter on right. Cleaning has gone from end of day task to multiple times throughout the day!

For the past twelve years our community has been pleased to have hosted the U.S. Forest Service and its contract affiliates at GLR. This year six separate firefighting aircraft and associated crews have based themselves in Gaylord. The three Fire Boss aircraft and the heavy lift helicopter pics are part of this team.

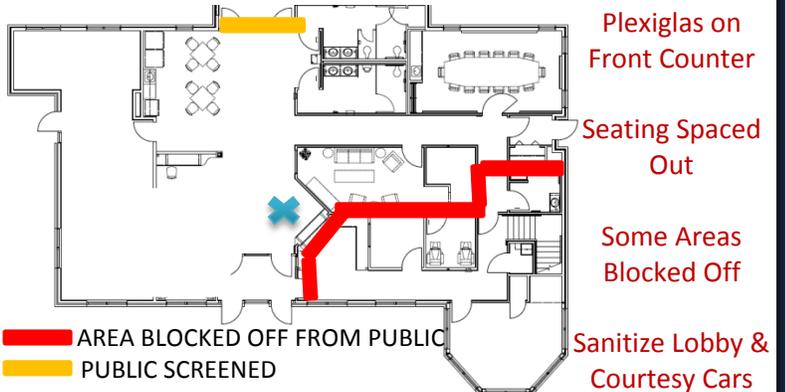

← Thank You to our friends at New Century Signs for making the banners for our airport fence for free! Just a small way to help thank all the Critical Workers

The month of May at GLR celebrates an important Star Wars day. **May the 4th Be With You!** Can't wait to see what our fuel sales are for the month!

GAYLORD REGIONAL AIRPORT COVID RESPONSE MEASURES

As You Were! - Stand By for News! No airport Vets Coffee in May, and to give us time to beat the COVID Crisis we are postponing the veterans coffee until later in the year. We will then assess at that time if and how we are to proceed. This is nothing new to you all. As veterans you have been through tough times, hard battles and long deployments. We know about "Hurry Up and Wait" and this time waiting could save a life. So have a coffee with someone by phone and maybe talk about how great the Air Force is or even one of those other branches! ☺ Until we **Form Up** again, stay safe and be well, Matt Barresi, Otsego County, Gaylord Regional Airport Director
